SUMMARY

Computer Science student exploring Operating Systems and Web Development. I'm always looking to leverage new technologies to build optimized, user-centric software solutions — guided by the idea that knowledge becomes more valuable when it's shared.

WORK EXPERIENCE

Full Stack Developer – IIMAS

Jun 2024 – Present

- Developed a comprehensive web application (Remote Lab) to facilitate remote access for programming and experimentation with programmable circuits.
- Collaborated with the backend team using **Django** (Python) to design and implement RESTful APIs.
- Worked closely with UI/UX designers to build a responsive frontend using **React**.

PROJECTS

FixiBar

A highly custom config for Hyprland compositor. This project bridges the gap between visual aesthetics and low-level system monitoring.

Portfolio Website

Developed a lightweight and high-performance personal portfolio website from scratch using Astro's island architecture.

EDUCATION

Ongoing **Computer Science** at Universidad Nacional Autónoma de México (**UNAM**)

2025 Fourth **HFC** Generation

2025 Introduction to **Android Development** at Instituto de Investigaciones en Matemáticas Aplicadas y en Sistemas (**IIMAS**)

Folio: 531 · Validator 

2023 - 2024 **Computer Specialist Technician** at **ENP 6** (Degree Completed)

SKILLS

Toolbox Arch Linux, Hyprland, Wayland, Neovim, Git, Bash, Astro, Tailwind, GSAP, Node.js, CSS, HTML, React, Python, Kotlin, Java, TypeScript, Django

Languages Spanish (Native), English (Intermediate), French (Conversational).

Soft Skills Collaborative, Mentorship, Leadership, Problem solving, Persistence, Continuous learning.
