PROFILE

Computer Science student interested in operating systems and web development. I aim to leverage technology to build optimized and maintainable software solutions — a firm believer that knowledge becomes more valuable when shared.

PROFESSIONAL EXPERIENCE

Full Stack Developer – IIMAS

- Contributed to the development of a comprehensive web platform (Remote Lab) to facilitate remote access for programming and experimentation with programmable circuits.
- Collaborated with the backend team using **Django** (Python) to design and implement RESTful APIs.
- Worked closely with UI/UX designers to build a reactive frontend using **React**.

PROJECTS

FixiBar

A highly customized configuration for the Hyprland compositor. This setup prioritizes low-level system monitoring, aesthetics, functionality, and productivity.

Portfolio Website

Developed a lightweight and high-performance personal website from scratch using Astro's island architecture.

EDUCATION

In progress **B.S. in Computer Science** at Universidad Nacional Autónoma de México (**UNAM**)

2025 Fourth Generation **HFC** (Ethical Hacking & Cybersecurity)

2025 Introduction to **Android Development** at Instituto de Investigaciones en Matemáticas Aplicadas y en Sistemas (**IIMAS**)

Folio: 531 · Validator [!\[\]\(1f56542a42e2413e44a2b2023033aa2e_img.jpg\)](#)

2023 - 2024 **Computer Specialist Technician** at **ENP 6** (Certified)

SKILLS

Toolbox Arch Linux, Hyprland, Wayland, Neovim, Git, Bash, Astro, Tailwind, GSAP, Node.js, CSS, HTML, React, Python, Kotlin, Java, TypeScript, Django

Languages Spanish (Native), English (Intermediate), French (Conversational).

Soft Skills Collaboration, Mentorship, Leadership, Problem-solving, Perseverance, Continuous Learning.
